FEATURES

1. Quad-core Cortex A7 CPU, CPU with up to 1.2GHz, high task processing; quad-core Mali-450 GPU, rendering sharper and more stable images.
2. More interfaces allow you to easily connect variety of audio-visual equipment, including computers, game consoles and other audio-visual equipment.
3. Multi-channel USB interfaces, plug-in mouse and keyboard support, and one standard USB 3.0 USB interface.
4. Equipped with Android 4.4 smart operating system, unique and simple UI design and the possibility to download large number of apps, it offers a richer and more exciting using experience.
5. Thanks to the built-in Wi-Fi module, web surfing is possible without additional network card and network cable.
6. Dynamic contrast technology improves clarity and contrast of the screen image.
7. With 3D graphics processing, 3D comb filter, dynamic color processing engine, intelligent motion compensation, it makes the screen image more clear and smooth, without ghosting.
8. High-quality LCD, no flicker, low radiation, reduces eye fatigue, protects eyes.
9. Ultra-thin, narrow edge, green energy-saving design: TV automatically goes into standby mode when there is no signal input within a few minutes thus effectively saving energy and prolonging the service life of the device.

SAFETY WARNING AND NOTICE

Thank you for choosing the high-performance and multifunctional smart LED-backlit LCD produced by our company. This valuable thing will bring you better audiovisual experience. The design of this product has given consideration to factors affecting personal safety, and the product itself has gone through strict tests prior to delivery. However, improper operation may result in electric shock and fire disaster. To ensure safety, prolong the service life of this product, and have the best possible performance out of it, please read the manual and marking label carefully before using it and comply with the following safety instructions. Please keep the user manual for later use.
Under Following Conditions:

- Power failure or unstable voltage.
- Abnormal sound or smell from the device.
- AC power cord is damaged.
- TV set is damaged due to falling off, knock or impact.
- Any liquid or foreign matters enter into the TV set.

If coal gas or other flammable gases leak, do not unplug the power cord of the TV set or other electric appliances; instead, close the valve of the gas immediately and open doors and windows.

⚠️ WARNING ⚠️

- Only use 100-240VAC, 60/50Hz power supply.
- This TV must be connected to a three pin socket outlet for safety.
- All cables can be connected or pulled out only after power supply is turned off.
- Do not fix the TV set on instable surface, or else it may cause falling off, damage, or even fire.
- Do not put the TV set in the environment:
  1. With direct sunlight, moisture, overheating or heavy dust;
  2. With flammable or explosive substance;
  3. With flammable or corrosive gas;
  4. In bathroom, kitchen, etc.
- Do not use damaged or improper power socket, and ensure that the plug and socket are connected properly.
- Keep the power plug and socket free of dust and metal pieces.
- Do not damage the power cord:
  1. It is prohibited to refit the power cord;
  2. Do not put heavy object on the power cord;
  3. Keep the power cord away from heat source;
  4. Do not drag the power cord when unplugging.
- Do not connect too many appliances to one power strip, or else it may cause fire due to high power consumption.
- Do not let open flame (e.g. lit candle) approach the TV set, or else it may cause electric shock or fire.
- Do not put the container filled with water on the TV set, to avoid electric shock or fire caused by water drop of splashing.
- Do not let any sharp object, metal or liquid enter into the signal connector or air vents, to avoid short circuit and product damage as well as electric shock.
- Slots on the case are designed to release heat so as to assure that all inside components will not reach an extra high temperature and can work normally for a long time. Please do not cover the holes while installing the device.
Do not touch the plug with wet hands, or else it may cause electric shock.

⚠️ Do not turn on the TV set in thunderstorm weather; instead, unplug the power plug and antenna connector to avoid lightning strike.

🚫 Do not disassemble the TV set by yourself, or else it may cause electric shock or fire. Contact qualified personnel for maintenance.

⚠️ ATTENTION

- Do not let children climb onto the TV set.
- Keep the small accessories away from children's reach to avoid swallowing.
- If the TV set won't be used for a long time, please turn off the device and unplug the power cord.
- Before cleaning the TV set, unplug the power cord and wipe with soft cloth; do not use chemical reagents and avoid foreign substances entering into the device. The incorrect cleaning (such as cleaning fluid, water, etc) may lead to damage of product's appearance, erasing products printing information, even flow into the device and damage components, causing the failure of the display.
- To adjust the position or angle of the TV set, please disconnect all wires and move slowly to avoid falling off.
- Do not rub with hard object, knock at, bend or squeeze the screen.
- Do not use the device immediately after transferring it from rooms with low temperature to rooms with high temperature, because it will cause fogging inside the device and failures.
- If the screen is broken and the liquid splashes on the skin, please wash with clean water immediately for 15 minutes, and seek medical attention.
- To carry the TV set with hands, please grasp the corners and hold the bottom; do not apply force on the panel.
- Displaying the same image for a long time or active image with fixed words, icons will leave "image persistence" on screen which will not disappear after powering off for a long time. This undesirable phenomenon is not covered by warranty.
- Healthy TV watching: Watch in appropriate light; poor light or long time watching may hurt your eyes.
- Unplug the power cord of the device to cut off the power supply.
- If a power plug or appliance coupler is used as disconnecting device, it should ensure easy operation.
- Power plug should be connected reliably. Loose power plugs may cause sparkle and fire.
- All the technical specifications in the user manual and on the packaging are subject to changes without prior notice. If there is slight deviation between the user manual and actual operation, the latter shall prevail.

Mounting and Connecting

Packing list

1. The TV set.
3. Remote control.
4. Power cord (or attached to TV set).
Mounting the TV set

**Tips on Installation**

- The TV set should be mounted near the AC power socket for easy plugging and unplugging.
- For your safety, please select appropriate wall mount bracket or base.
- To avoid injuries, it is required to place the TV set on stable surface, or fix on firm wall.
- Ask qualified personnel to mount the TV set on the wall. Improper mounting may result in instable TV set.
- Do not place the TV set at any place susceptible to mechanical vibration.
- Do not place the TV set at any place that insects may enter.
- Do not mount the TV set against air conditioner, or else the internal panel of the display may condense moisture and cause failure.
- Do not place the TV set on a surface with strong magnetic field, or else it may be interfered with and damaged by electromagnetic wave.

**Mount on the wall**

Obstructing the air circulation

**Ventilation**

- Please keep this space at least around the TV, as shown in the figure.
- Do not cover the air vents or insert any object into the enclosure.
- Do not put the device in limited space, e.g. bookcase or embedded closet, unless the TV set is properly ventilated.

Connecting peripheral equipment

You can connect various devices to the TV set and view high quality images. If the video device has HDMI, AV, PC and other video output/input ports, you can select one of them and connect them to corresponding input or output ports of the TV set. After connecting, press „SOURCE“ key, and the screen will display the menu of the signal source. Press the „▲/▼“ key to select the input signal, and press „OK“ key to confirm. The connecting mode is shown in the figure.

**Note:**

1. When connected to equipment with MHL function, please select HDMI3 as input signal source.
2. USB interfaces support peripheral equipment, including USB camera, USB mass storage device, USB mouse, keyboard, etc.
3. ARC function is optional, and please refer to the device.
4. The peripheral equipment and cables described in this manual should be purchased separately.
5. The number of HDMI and USB interface are variable. Please refer to the configuration of the device.
**Connecting power supply**

To power socket
(100-240VAC 60/50Hz)

**Coaxial-OUT connection**

Connect to the audio amplifier with coaxial interface

**MHL function connection**

Mobile phone or other equipment with MHL function

---

**Warning**

When connecting outdoor antenna to signal port of the TV set, please turn off the main power switch of the TV set first. Do not approach the outdoor antenna to high voltage mains power line to avoid electric shock. The wired network antenna connected to this TV set must be isolated from the protective grounding, or else it will cause fire or other hazards.
Panel Control Keys

1. Power button
2. Menu button
3. Source button
4. Channel buttons
5. Volume buttons

- Connect to the devices with video input interface (e.g. Monitor)
- Connect to the devices with AV output interface (e.g. DVD, VCR, game console)
1. Power LED indicator and remote receiving window.
3. **SOURCE (±)**: Press this key to enter the menu and select signal source; during OSD menu operations, press this key to confirm the operation, with the same function as the “OK” key on the remote control.
4. **CH+/CH- (← CH →)**: Channel up/down key; during OSD menu operation, press the keys to select items, with the same function as the △/▽ key on the remote control.
5. **VOL+/VOL- (← + →)**: Volume up/down key; during OSD menu operation, press the keys to adjust the analog value, with the same function as the ◄/► key on the remote control.
6. **MENU (⌫)**: Press this key to show the setup menu.
7. **Standby**: To switch the TV on or back to standby.

**Note:**
1. The appearance varies depending on the model, and the actual product shall prevail.
2. The “SOURCE” and “MENU” keys are invalid in smart mode; in this case, please operate with the remote control.

---

**Remote Control**

**Method for Installation of Remote Control Battery**

Remove the battery compartment cover and insert two AAA (No. 7, 1.5V) batteries; make sure the polarity of the batteries is in accordance with the polarity marks “+” and “-” in the battery compartment of the remote control.

**Precautions for using the remote control:**

1. The remote control should be pointed at the remote control sensor during operation. An object placed between the remote control and the remote control sensor may impede normal operation.
2. The remote control should be prevented from strenuous vibration. Besides, please do not set or place the remote control under direct sunshine, as heating power may result in deformation of the remote control.
3. Remote control failure may occur when the remote control sensor of the main unit is under direct sunlight or strong lighting; in this case, please change the angle of lighting or this TV set, or operate the remote control near the remote control sensor.
4. Low battery will influence the remote control distance, in which case, the battery should be replaced with a new one. If the remote control is going to be idle for a long time or the battery runs out, please take the battery out to prevent the remote control from being corroded by battery leakage which may result in damage and failure of the remote control.
5. Please do not use batteries of different types. It is not allowed to use old and new batteries together; the batteries should be replaced in pair.
6. Please do not throw the batteries into fire or charge or decompose the batteries; do not charge, short-circuit, disassemble/assemble, heat or burn used batteries. Please dispose the waste batteries pursuant to relevant regulations on environmental protection.
Keys of the Remote Control

- **POWER ()**: Switch between working and standby status.
- **SNAPSHOT ()**: Capture the screen.
- **MUTE ()**: Turn on/off the sound.
- **Letter/number keys**: Press to enter letters and numbers.
- **F1 (3D)**: Turn on/off still image in TV mode.
- **Backspace ()**: Delete a character/view program list.
- **Channel list ()**: Show the home page of smart TV.
- **Home ()**: Show the OSD menu.
- **Cursor keys (, , , )**: Select items or adjust values.
- **OK**: Confirm the operation.
- **VOL+/VOL-**: Turn up/down the volume.
- **Return ()**: Press this key to return to previous page.
- **SOURCE**: Press this key to select the signal source. (only in TV mode)
- **CH+/CH-**: Change program channel.
- **INFO**: Show the information of the TV program.
- **16:9**: Switch the aspect ratio.
- **L/R**: Select NICAM mode (under ATV signal source).
- **INDEX ()**: Graphic homepage/Index (PLAY)
- **ZOOM/TS ()**: Enlarge graphic. (PAUSE)
- **REVEAL ()**: Show/hide graphic. (STOP)
- **TTX ()**: Open graphic function. (ROTATE)
- **HOLD ()**: Graphic stops updating. (LAST)
- **LIST ()**: Graphic directory. (NEXT)
- **REC ()**: Record program. (Fast Forward)
- **RADIO ()**: Change to radio mode. (Fast Forward)
- **Red key**: Special function key.
- **SUBTITLE (Green key)**: Show/close characters. (special function key)
- **FAV (Yellow key)**: Favorite channel. (special function key)
- **EPG (Blue key)**: Electronic channel instructions. (special function key)

**Note:** The appearance of the remote control may be different from this diagram; please refer to the real object as standard.
Basic Operations

Turning on/Standby

Plug power cord into the electrical socket. Press \( O \) button on the TV set (if it doesn’t have this button, you needn’t operate this step), then press \( \mathcal{U} \) key on the remote control or on the TV set to turn on the TV. The screen displays “Welcome” menu. Press \( \Delta/\nabla \) key on the remote control to select language which you wish, then select Start and press \( \text{OK} \) key on the remote control to confirm. The screen displays “Please Select Antenna Type and Start AutoScan”. Press \( \langle/\rangle \) key on the remote control to select Antenna Type which you wish, then select Next and press \( \text{OK} \) key to go into next step (you can also select Skip and press \( \text{OK} \) key to skip.) The screen shows the interface. Press \( \langle/\rangle \) key on the remote control to select Search Type which you wish, then press \( \nabla \) key and you can select country where you are by pressing \( \Delta/\nabla/\langle/\rangle \) key on the remote control. The device starts auto channel search after pressing \( \text{OK} \) key. (If Antenna Type is DVB-C, you have to press \( \langle/\rangle \) key on the remote control to select Full Scan or Quick Scan. Press the \( \text{Red} \) key to set modulation. Press \( \text{Green} \) key to set symbol rate. Press \( \text{Yellow} \) key to set Network ID. After selecting Start Scan, press \( \text{OK} \) key to confirm. The device starts scan.

In power on state, press \( \mathcal{U} \) key to switch to standby mode.

Special Tips: This device uses energy saving technology. If there is no signal input in power on state, it will enter standby state automatically in five minutes; the device will enter standby state automatically at specified sleep time.

Signal source selection

After turning on the device, press \( \text{SOURCE} \) key on the remote control or control panel to show the “Input Source” menu on the screen; press \( \Delta/\nabla \) key on the remote control or \( \text{CH+/CH-} \) key on the control panel to select a signal source. Press \( \text{OK} \) key on the remote control or \( \text{SOURCE} \) key on the control panel to switch to the selected signal source.

Menu operation description

The menu operations in this chapter are described in TV state; the operations in other states are basically the same. The operation of intelligent mode, please refer to following intelligent platform operating instructions. Press “\( \text{MENU} \)” key on the remote control or control panel to show the main menu on the screen:

1. Press \( \langle/\rangle \) key on the remote control or \( \text{VOL+/VOL-} \) key on the control panel to select a menu from Picture, Sound, Channel, Setting, Parental Control.
2. Press \( \Delta/\nabla \) key on the remote control or \( \text{CH+/CH-} \) key on the control panel to select an item in the menu.
3. Press \( \text{OK} \) key on the remote control to enter the submenu.
4. Press \( \langle/\rangle \) key on the remote control or \( \text{VOL+/VOL-} \) key
5. When the main menu shows on the screen, press \( \text{Return} \) key to exit the main menu.
6. During menu operation, the icons of invalid options will change into grey.

Program scanning

Tune the programs before watching the TV for the first time. Before scanning, please make sure that the antenna has been connected properly and select the desired Antenna Type. In the following example of channel searching, Antenna Type is DVB-T.
Auto Tuning
Press \(\text{MENU}\) key. Select Channel > Auto Tuning. Press \(\text{OK}\) key, then press \(\downarrow / \uparrow\) key to select Search Type: ATV+DTV, ATV, DTV. Press \(\downarrow\) key. You can select country where you are by pressing \(\triangledown / \triangleright / \downarrow / \uparrow\). Press \(\text{OK}\) key to confirm. The device starts auto tuning. During auto tuning, the screen displays a message „Are you sure you want to exit DTV Tuning?“ by pressing \(\text{MENU}\) key. Select YES and press \(\text{OK}\) key to confirm, or select NO and press \(\text{OK}\) key to cancel. During auto tuning ATV channel, the screen displays „Are you sure you want to exit ATV Tuning?“ by pressing \(\text{MENU}\) key. Select YES and press \(\text{OK}\) key to confirm, or select NO and press \(\text{OK}\) key to cancel.

DTV Manual Tuning (In DTV signal source)
Press \(\text{MENU}\) key, select Channel > DTV Manual Tuning. Press \(\text{OK}\) key to enter DTV Manual Tuning menu. Press \(\downarrow / \uparrow\) key to select channel, then press \(\downarrow\) key to select and press \(\triangledown / \triangleright / \downarrow / \uparrow\) key to confirm. After searching, the DTV Manual Tuning menu closes automatically. During the search you may press \(\text{MENU}\) key to interrupt the search and return to the last menu.

ATV Manual Tuning (In ATV signal source)
Press \(\text{MENU}\) key. Select Channel > ATV Manual Tuning. Press \(\text{OK}\) key to enter ATV Manual Tuning menu. Press \(\triangledown / \triangleright\) key to select Channel/Color System/Sound System, and then press \(\downarrow / \uparrow\) key to select which you wish, then select Search. Press \(\downarrow / \uparrow\) key to search from low frequency or high frequency. After selecting frequency, press \(\downarrow / \uparrow\) key to tune from low frequency or high frequency. During manual searching, you also may press \(\text{MENU}\) key to interrupt the search and return to the last menu.

Menu setting list
Refer to the table below for the specific setting in the menu.

<table>

Time-shift option

In DTV mode, press „ZOOM/TS“ key, the Time-shift option menu shows on the screen and the program is in suspended state. Press „INDEX“ key to resume play program. Press „REVEAL“ key to stop and quit time-shift. When user leaves program for a short time, time-shift function can suspend and cache the playing program to U disk. When user resumes playing, the program can continue to be played.
EPG option

Change input signal source to DTV (detailed information refers to "Signal source selection"), press "EPG" key to get into electronic program instruction interface, the left side of interface is channel area digital channel display list, the right side of interface displays the channel related program name in order, press „<>/‟ „key can choose programs in different times, press „▲/▼‟ „key to change to programs of other channels.

Related remote controller shortcut operation as bellow:
1. Press „Red‟ key to check program plan management list, press „▲/▼‟ „key in program plan management list to choose program, press „OK‟ key to choose program, press „<‟ „key can select bellow orders.
   - Clear Selected: delete current selected program in program plan management list
   - Clear all: delete all programs in program plan management list
   - Close: closes the program plan management list.
2. Press „Green‟ key to view the 24 hours channel program lists before the current session.
3. Press „Yellow‟ key to view the 24 hours channel program lists after the current period.
4. Press „Blue‟ key to view the current selected program information, select Set Remind in information interface, press „<>/‟ „key in setting remind interface to select starting time and mode, press „▲/▼‟ „key to modify time value and mode; select to confirm, press „OK‟ key to finish reminder setting, program put in plan management list; select Close, press „OK‟ key to drop out.
5. Play current program in current time, press „OK‟ key.

Notes:
1. Electronic Program Guide-related information are provided by broadcasting company. Program entries may appear blank or with no information. When new information is available, the screen display will be automatically updated.
2. Reminder setting time should be later than the current time; otherwise the appointment will be unsuccessful. The same time period can only respond to one program.
Hotel Function (optional)
Press „MENU“ key to display the main TV menu, and then press „4578“ key to display the hotel function menu. Press „▲/▼“ key to enter into the menu and select the item which you need to adjust, and then press „◄/►“ key to adjust the value or state.

Instructions for Intelligent Platform Operation

Basic Operations

Press „▲” key on the remote control to show the home page.
1. Press „▲/▼/◄/►“ key to select an application;
2. Press „OK“ key to run the application;
3. Press „Return ()” key to return to previous page

Special Tips
The operations in smart mode are complicated. The user can install Apps with different operation methods, and the operations described in this manual are for reference only. Part of applications need external equipment to run normally. Certain functions are invalid from the remote control. For more convenient operation, please operate with USB mouse and keyboard.

Quick Start

Before using this device, please get familiar with the operations below for better experience.

Mouse Control
1. Click: Click the mouse and release immediately;
2. Press and hold: Click the mouse and hold for at least three seconds;
3. Clicking the left mouse key has the same effect as pressing „OK“ key on the remote control;
4. Clicking the right mouse key has the same effect as pressing „Return“ key on the remote control.

Language input setting

Language: Select the system language; select Settings > Language & input > Language, and press „OK“ key; press „▲/▼“ key to select the desired language, and then press „OK“ key.

Selecting Input Method: In the smart mode, select Settings > Language & input > Default, and press „OK“ key; choose input method in the sub-menu; you can also download and install third party input method.

Setting System Time: In the smart mode, select Settings > Date & time > Automatic date & time, press „OK“ key and the system updates the clock from the network automatically; if the TV set isn’t connected to the network, you can only set the system time manually.

Screenshot: Before screen shooting, please insert the USB mass storage device into the USB interface, and press „SNAPSHOT“ key. After screen shooting, the pictures are saved in the „:\Pictures\Screenshots“ folder in the USB mass storage device.

Smart Applications

Browser: You can use the browser to show the text, video, audio and other information on the Internet. Before accessing the Internet, please connect your TV set to the Internet; refer to „Settings > Wireless/Ethernet“ for details.
• **How to access web address?** Press „▲/▼/◄/►” key to select the address bar, and type the web address in the address bar, then select the [Go] icon in the input method, and press „OK” key to access the web address.

• **How to save a page in the Bookmark?** Select the icon in the browser interface, and press „OK” key to enter the browser tab and enter the web address. Select Account, and press „OK” key. Press „▲/▼” key to select the account for storage, and then press „OK” key. Select OK, and then press „OK” key to add the bookmark.

• **How to copy and paste the text in the web page?** Place the cursor on the text that should be copied, press and hold the left mouse key. When the pair of selecting cursors appears on the screen, drag the cursor to select the text. Select Copy on the screen, and click the left mouse key. Select the target position, press and hold the left mouse key, and click Paste in the popup dialog box.

**E-mail:** You can log in to the private or business e-mail accounts, and receive and send e-mails.

**Apk Installer:** The Apk installer helps users to manage applications, and allows users to install or uninstall apps on local disk.

**Note:** Select Settings > Security > Unknown sources to allow installation of app from unknown sources.

• **How to install an application?** Enter Apk Installer, select Install and press „OK” key to enter; Select the path of the target installation file on the local disk, locate the installation package in the right panel, and then press „OK” key.

• **How to uninstall an application?** Select Manage, and press „OK” key to enter. Select the application to be removed, and press „OK” key. Select Uninstall, click „OK” key, and the system will uninstall the application automatically.

**Multimedia Player:** In smart mode, select Multimedia in the main interface, and press „OK” key to run. Select the file type from all, picture, song and video on the left.

• **Playing Files from local disk device:** Before playing files in the local disk, insert the USB mass storage device into the USB interface.

Select local disk device in the file directory in the center, and press „OK” key to enter. Select back in the directory, press „OK” key to return to the previous folder. Select the target folder, press „OK” key to enter the folder, and press „Return” key to return to the desktop.

**Attention:**
1. Nonstandard USB devices probably won't be recognized; in this case, please replace a standard USB device;
2. The stream media system has certain restriction on the format of files; the playing will be abnormal if it is out of the system restriction;
3. Do not remove the USB device while playing, or else the system or device may have problem; Before replacing the USB device, please turn off the device's power supply;
4. The system supports standard USB1.1, USB2.0 and USB3.0 devices, such as USB mass storage devices and removable hard disks;
5. The maximum output current of the USB port of this device is 500mA, and the self-protection will be enabled if it is beyond this limit; please use external power supply if an external device of higher current will be connected;

6. The system is complicated; when it is reading or playing files, the screen may be still or certain functions may be invalid due to the compatibility and stability of the USB device; in this case, please turn off the device and re-initialize the system.

While playing, press „OK“ key to show the menu options as in the picture above; select an icon, and press „OK“ key to perform the operation; you can press „Return“ key to exit playing, or press “⏪, ⏯, ⬅️, ⬆️, ⫸” keys on the remote control to perform shortcut operation.
Settings

**Wireless setting**
1. In smart mode, select Settings > Wi-Fi, press „OK“ key, then press „▶“ key to choose WLAN switch, press „OK“ key to open the wireless network function; the device automatically searches for nearby wireless network signal. When the network has searched icon indicate that the device connects to the network without a password. When searching for the network to have icon indicate that the network is encrypted, you must enter the correct password to connect to the network (Or select the E on top right corner and press „OK“ key, then select Scan, and the device will scan nearby wireless network signal);
2. Select the network you want, and press „OK“ key;
3. Type network connection password in the Password box, then select Connect and press „OK“ key to connect to network;
4. If your router does not automatically obtain an IP address, you need to select Show Advanced Options, and press „OK“ key. Select IP settings, and press „OK“ key, then select Static in the field;
5. Enter the IP address, gateway, domain names and other information; (IP address, gateway, domain names and other information are available to the relevant network administrator);
6. Select Connect again and press „OK“ key to connect to the network.

**Wi-Fi Direct**
1. Select Wi-Fi, and press „OK“ key. Press „▶“ icon, press „OK“ key. Select Wi-Fi Direct, and press „OK“ key to enter. Select SEARCH FOR DEVICES, and press „OK“ key, then the device will automatically search for a matching device;
2. Select the device you want to match, press „OK“ key to match the invitation;
3. After a successful match between the two devices, data can be transmitted to each other; (for the Wi-Fi Direct match to be succesfull, both devices must support Wi-Fi Direct feature and be mutually compatible)
4. Press any key on the remote control to exit the Wi-Fi Direct function. (Except „POWER (○)“ key )

**Ethernet**: (Dial to connect to the network)
1. Select Ethernet and press „OK“ key, then press „▶“ key;
2. Select Proxy and IP settings, set the proxy and IP address;
3. Select PPPoE settings, press „OK“ key, enter your user name and password, select connection, press „OK“ key to connect to the network.

**Wi-Fi hotspot**
1. Select More ..., and press „OK“ key, then press „▶“ key;
2. Select Tethering, press „OK“ key;
3. Select Wi-Fi hotspot, press „OK“ key to check the open WLAN hotspot functionality;
4. Select Settings Wi-Fi hotspots, press „OK“ key;
5. Enter the hotspot name in the Network SSID field; the system recognizes it as „AndroidAPP“;
6. In the security field, press „OK“ key to select security type. When it is an open network, a password is not required to connect to the network, so select the security type None. But then any device can connect to your network. If you select WPA PSK/WPA2 PSK encryption, you need to enter a password with more than eight characters, and if other devices search for your shared WI-FI network, they then need to enter the correct password in order to connect to your network;
7. The system will automatically configure a password for you, but you can also manually type a password in the password box;
8. Select Save and press „OK“ key to save the settings, then other Wi-Fi devices in search for Wi-Fi networks will search for your network in the area.

**Sound**: Music setting, video and other volume and system beep.

**Instructions for Intelligent Platform Operation**

**Storage**: View storage space and formatting information such as USB storage devices.
**Apps:** Applications in Management System.

**Security:** Set the device to display the administrative password. Language & input: Set the system language and input method. Backup & reset: Reset factory settings.

**System Update:** Update system.

**Date & time:** Set date and time.

**About TV:** View Models, System Version, Memory Information.

**Troubleshooting**

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible causes</th>
<th>Solutions</th>
</tr>
</thead>
</table>
| Snowflake spots occur in the TV images and there is noise in accompanying sound. | 1. The antenna connector is loose, or the cable is damaged.  
2. The antenna type is improper.  
3. The antenna direction or position is inaccurate.  
4. The signal is weak. | 1. Check if the antenna plug is loose or the cable is in good condition.  
2. Check the antenna type (VHF/UHF).  
3. Adjust the direction and position of the antenna.  
4. Try to use signal enhancer. |
| There is neither display nor sound on the screen. The indication light is not on. | 1. The power plug is loose or the power supply is not connected.  
2. The power switch is not turned on. | 1. Check if the power line is connected.  
2. Press the „Ω“ button on the panel. |
| Dotted line or strip disturbance occurs in TV images. | The signal is disturbed by car, neon light, electric hair dryer, etc… | Do not use electric hair dryer aside the TV set and adjust the antenna direction to reduce disturbance. |
| Double images occur on the TV screen. | 1. TV signals are reflected by surrounding high mountains or mansions.  
2. The direction of the antenna is inaccurate. | 1. Use high oriented antenna and use the Fine Tune function of „TV“.  
2. Adjust the direction of the antenna. |
<p>| The images are colorless. | The color saturation is adjusted too low. | Enter „PICTURE“ setting to increase color saturation. |</p>

Base Installation Instructions

Put the device flat on table first. Install the base in the device back cover bottom in the arrow direction, and align the positioning hole on top of V cover of base with the positioning raised stand on the bottom of device back cover, then fasten the screws. (Notice that the base has to be adjusted as shown in the figure, otherwise it cannot be installed.)

Remark: The actual base and device appearance may be different from pictures; please refer to the actual device.
