#### Low-noise airflow

Without decreasing the airflow volume, this device feature can help reduce noise levels of AC indoor unit by lowering the fan

#### Horizontal swing

You can use the horizontal swing feature to adjust the airflow direction, if you prefer the air from the AC to blow sideways.

#### Additional health filter: Lysozyme

This AC uses a new type of lysozyme filter, which helps with ensuring air quality. When air goes through the filter, the latter can destroy harmful bacteria and viruses.

#### Additional health filter: Ionizer

A certain level of ion saturation makes harmful microorganisms in the air fall to the ground, reducing chances of people inhaling them. Devices with an ionizer can be extremely useful for those suffering from allergies.
