

1. Extreme Conditions:

The rugged phone EXPLR9 is built to endure temperatures ranging from -40°C (-40°F) to $+70^{\circ}\text{C}$ (158°F). However, while it is designed to endure in these conditions, extreme temperatures may still affect its performance. It is recommended to expose it to temperatures within the specified temperature range for a short period of time to ensure optimal results.

2. Water Resistance:

The rugged phone EXPLR9 is certified with an IP68/69K rating, which means it can withstand immersion in 1 meter of fresh water for up to 30 minutes. Accidental damage, wear and tear, or misuse may compromise its waterproof capabilities. Avoid submerging the rugged phone EXPLR9 for extended periods, and ensure that all port covers are securely closed before exposing it to water.

3. Drop Survival:

The rugged phone EXPLR9 has been tested to survive falls from a height of 1.5 meters (5 feet) on a flat surface. The degree of damage may vary depending on the nature of the fall, the surface it lands on, and other factors.

4. Certification Standards:

The IP68/69K and MIL-STD-810H:2019 certifications indicate that the phone meets specific durability and ruggedness standards. However, these certifications do not guarantee the device's invincibility. Please use caution and common sense when using the phone in challenging conditions.

5. Limitation of Liability:

The manufacturer and seller are not responsible for any loss of data, inconvenience, or damages arising from the use or inability to use the rugged phone EXPLR9, even if the rugged phone EXPLR9 is within its specified operational parameters. By purchasing and using our rugged phone EXPLR9 with IP68/69K/ MIL-STD-810H:2019 certification, you acknowledge and accept the terms and conditions outlined in this disclaimer.
