

Bright & beautiful images

Say goodbye to low-quality picture, dead pixels, and other annoying issues you had to deal with! Whether you use the monitor for work or fun, it's time to enjoy great color accuracy, contrast and viewing angles.

Exceptional strength

While designing new Tesla Series 6 & 9 monitors, we've focused on premium materials. Screen frame and monitor stand are made of aluminum alloy; apart from exceptional strength, this design also adds to the elegant, sophisticated look of the device.

Impressive design

Apart from high-quality features, Tesla Series 6 & 9 monitors are designed to bring elegance and sophistication into your every working day. They're super slim, beautifully crafted and made to fit any modern environment: you'll see precisely what we mean once you unpack that box.

An instant connection

With Audio Output, you can easily plug your headphones (or speakers) directly into the monitor, enjoy undisturbed work and avoid issues with short cables. This model also has HDMI and Type C ports, so it's easy to connect the devices you need.

Not gaming monitors, but...

... you can still use them to have fun! Try some easy gaming and enjoy AMD FreeSync compatibility, quality picture, as well as great response time of 5 ms with overdrive on.

User-friendly

Keep it simple with intuitive user interface and fast access to all settings. Change inputs or predefined image parameters with just a couple of clicks, switch languages, or adjust other elements according to your preferences.
