

### Total No Frost

Total No Frost is a function based on the circulation of cold air, that reduces humidity and prevents the accumulation of frost on the food in the refrigerator and ice on the walls of the freezer. The refrigerator and freezer compartments have separate airflows, so that smells don't mix.

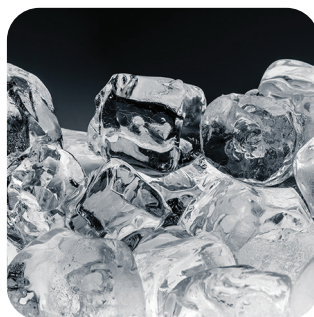

### Minibar

Now you can quickly get your favorite drinks or snacks, thanks to a minibar-like compartment, easily accessed by opening the smaller fridge door. This solution also helps you save energy, as you don't have to open the main refrigerator door every time you'd like a refreshment.

### Energy class E

According to the new energy classification, this refrigerator belongs to class E. Compared to appliances in lower classes, this device consumes less energy, which is good for the environment and also saves you money. It is equipped with excellent thermal insulation and first-class cooling system components.

### Ice maker

With a convenient ice maker, this Tesla model has ice cubes instantly available whenever you need them. Friends coming over? No worries, as this compartment can store up to 2.5 kg of ice!

### Super cooling

Want those drinks you've just put in the fridge to be very cold, very fast? No worries – our useful super cooling feature is here to the rescue, just in time for an important game or a favorite movie.

### Water dispenser

An external water dispenser is a convenient addition to this model, allowing you easy access to cold water anytime. Forget about loads of bottled water in the fridge, and enjoy this simple alternative!
