

Heat pump technology

Heat pump technology makes your tumble dryer more efficient, helps it work faster, and it also allows you to save energy and be more environmentally friendly by reducing power consumption. This system can reuse the heat generated during the drying process - and it can also control the temperature inside the drum in order to protect your clothes, keeping it below 50°C.

Clean and safe

The Clean and safe feature is automatically activated during the drying cycle, while the Hygiene Pro system helps keep your laundry clean: after the cycle is completed, the inner drum will keep the temperature for more than 30 minutes to help with sanitizing. The drum will also rotate once in a while for a certain amount of time after the cycle is done, in order to prevent creases.

Wool care

This Tesla device has a program for drying machine-dryable wool products, certified by The Woolmark Company. It is designed especially for wool garments, in order to prevent damage to these sensitive clothing items - but only if they're dried according to the instructions on the garment label, as well as those issued by the machine manufacturer.

Silent drying

If you're used to drying your clothes at night, or you simply want the device to be even quieter than usual, make sure to use our specially designed night mode. Once this feature is activated, the rotation speed will decrease, the drum will spin more gently, and the amount of air inside the drum will be limited, which makes the operation silent throughout the cycle.

Drum light

LED light in the drum is a convenient addition that illuminates the drum from inside, which makes it easy for you to see if you've taken out all of the laundry - or if any clothing items have remained hidden inside. This way, you'll never have to wonder how did that one different-colored sock end up being dried with your white load!

Touch screen

Compared to traditional buttons, touch screens last longer, and they also improve machine's overall accessibility and aesthetics. When it comes to this specific Tesla device, LED digital display helps you keep a close eye on the drying process, allows you to preset the start time, keep track of all the important cycle information, and enjoy many other useful features.

Strong and beautiful.

FEATURES		
Rated Power Supply	220V~240V~	
Rated Frequency	50 Hz	
Rated Drying Capacity	10kg	
Rated Power	750 W	
Rated Current	3.5 A	
Motor Power	150 W	
Display Type	LED	
Display Color	White	
Drying Type	Condensing witha heat pump	
Drying Control	Electronic	
Interior lighting	Yes	
Plug type	Euro Plug	
Power cord length	1,5 m	
Transparent windows	Yes	
Reverse tumbling	Yes	
Buzzer	Yes	
Venting pipe options	Yes	
Fault Check Display (indicator)	Yes	
Child Lock	Yes	
ENERGY RATING		
Energy Efficiency Class	A+++	
Condensation Efficiency Class	B	
Annual energy consumption (AEC)	210,7 kWh/annum	
Energy consumption (full load) (Edry)	1,75 kWh	
Energy consumption (partial load) (Edry1/2)	0,94 kWh	
Weighted programme time of the standard cotton programme (Tt)	137 min	
Programme time at full load (Tdry)	185 min	
Programme time at partial load (Tdry1/2)	100 min	
Condensation efficiency at full load (Cdry)	88%	
Condensation efficiency at partial load (Cdry1/2)	88%	
Airborne acoustical noise emissions	66 dB	
PROGRAMMES AND PERFORMANCE		
Number Of Program	14	
Knob selection	Cotton- Iron	Yes
	Cotton- Standard	Yes

PROGRAMMES AND PERFORMANCE			
Knob selection	Cotton- Extra	Yes	
	Synthetics-Extra	Yes	
	Synthetics-Standard	Yes	
	My Cycle	Yes	
	Wool	Yes	
	Mix	Yes	
	Shirts	Yes	
	Baby care	Yes	
	Bed Linen	Yes	
	Outdoor	Yes	
	Time Dry	Yes	
	Refresh	Yes	
	Button Function	On/Off	Yes
		Start/Pause	Yes
Delay		yes (24 hours)	
Anti-crease		Yes	
Intensity		Yes	
Signal		Yes	
Child Lock		Yes	
Hygiene		Yes	
Silence Dry	Yes		
Lamp	Yes		
SPECIFICATIONS			
Volume Of Inner Tub	125 L		
Inner drum material	Galvanized steel plate		
Porthole	375 mm		
Net Dimensions (W×D×H)	595x640x845		
Gross Dimensions (W×D×H)	685x695x885		
Net Weight	53 kg		
Gross Weight	57 kg
