

Feel-good indoor climate

Manage dry indoor air

Boosting the amount of moisture in the air, Tesla humidifiers are here to help you battle dry air in any room, and reach that perfectly comfortable humidity level! Gone are the days of dry skin and itchy eyes caused by excessively dry air: it's time to relax, and enjoy spending time at home.

Feel your best

Tasked with taking care of optimal humidity levels, this device can also help you enjoy the smells you love all throughout the day! Simply add a bit of your favorite aromatherapy scent as per instructions, and you'll feel soothing fragrances continually coming through the 360° rotating mist nozzle.

Class, comfort and convenience

This Tesla device can humidify 20-25 m³ per hour, with mist output of 150 ml/h, and a water tank of 2,2 liters. For your convenience, it will automatically switch off when the tank is removed, or if there's no water left inside.

Relax and unwind

In order to support all your daily needs and routines, the humidifier can work in three operating modes: high, mid, or low mist. It also has a special "sleep mode", so you can enjoy your rest & reset time even more, as well as mood light feature - for that calming, relaxing atmosphere in the evening.
