

Sleek & sophisticated

Looking for a quality washing machine that allows you to comfortably load your laundry, provides easy access, and offers a simple installation process? This Tesla top-loading washer can be a great choice for your home, as it combines a sophisticated design with lots of great features – for clean and fresh laundry, every day!

Easy access

This top-loading washing machine allows you to easily put the clothes inside without having to bend over, while a wide lid makes it easier to fit large pieces of clothing. LED display is conveniently placed on the top of the device, making it simpler to keep a close eye on the washing process, preset the start time, etc.

Self-leveling feet

Self-leveling feet not only make the installation process easier, but also help your washing machine remain balanced and level. This helps with preventing and reducing excessive vibration (which can cause damage to your machine), and also lowers the noise level to minimum while the machine is working.

Child lock

If you're looking for a way to prevent your kids from playing with the controls, or even unintentional use, the child lock feature is a great solution. It is designed to lower the chances of them accidentally turning the machine on or selecting an option, by keeping certain buttons and features locked until you turn the child lock off.

Delay start up to 24 hours

Want to schedule a washing cycle to start at a certain time? Just choose a time that fits your needs – up to 24 hours in advance. Simply load your clothes into the machine, put the detergent in, and then set the timer: once the moment comes, the washer will automatically start the selected cycle.

Various cycles

This Tesla model has various cycle options: select the one that best fits your needs, according to the quantity of the clothes you're washing, the cycle length, or different fabrics. There are specially designed cycles for large loads, woolen clothes, fabrics that require extra care, etc.

POWER & CODE	
Voltage (V)	220V-240V~
Frequency (Hz)	50
Power (W)	540
Plug	G (UK)
Real capacity (Kg)	12
Max water level (L)	78
Normal washing time (min)	55
Inner tub dimensions(mm)	Φ475 x 376
Control water level	Electronic
All water inlet	Back
Cold water inlet	Yes
Hot water inlet	Yes
Drain pump	Yes
SPECIFICATION	
Max Spin Speed RPM	650
Washing noise(dB)	62
Spin noise(dB)	72
Net dimensions(mm)	580x625x960
Packaged dimensions(mm)	666*665*1008
Net weight (Kg)	32.6
Gross weight (Kg)	37.2

SPECIFICATION		
Material	Control panel	ABS
	Top lid	Flooding glass
	Pulsator	PP
	Inner tub	SUS430
	Cabinet	Steel (pcm)
