TESLA | S635 LED TV **75S635BUS**

POWERED BY Google TV

A true Google TV™ experience.

Google TV is the latest version of Android TV OS, designed for a superb watching experience. It's especially great for streaming platform users, because it can group content from different platforms, and organize it by topics or genre. Additionally, the recommendation feature - based on your previous choices - makes finding the next favorite TV series or movie easier than before!

Improved colors and contrast

UHD models from this series support HDR and HLG, while HD and FHD models have Dynamic Color Boost option. Additionally, the new Tesla TV has an "eye comfort" feature, which protects the users' eyes while watching TV. For a great contrast and an even better picture, we've added local contrast control – a feature that makes the difference between black and dark parts of the image clearer.
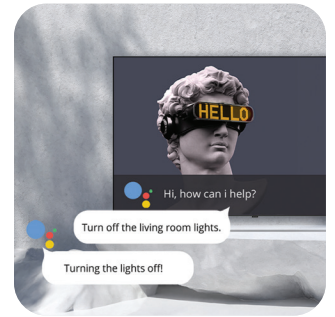

Top-quality sound

D class audio amplifier, combined with excellent BOX speakers, provide this TV series with an amazing sound – regardless of the screen size you choose. This is especially true for UHD models, thanks to larger speakers and support for DTS Studio Sound.

Built-in Chromecast

Google Chromecast is a feature that Tesla users know well: it allows them to control the TV using their phones, and play content on the big screen. The device streams the content directly from the Internet, not affecting the phone battery and other functions. You can also control your TV with a mobile phone using Google TV™ or Google Home app!

Google Assistant

Google Assistant allows you to use voice commands to find your favorite movies or TV shows, launch apps, play music, and control the TV or other smart devices in your home. You can also use this feature to "ask" Google for a movie or a TV show recommendation – an even simpler way to discover and enjoy new TV content!

Quality you can rely on

This series especially highlights the proven Tesla quality of manufacturing, with top-notch materials and a great finishing touch. In order to provide an amazing picture for our users, we've used panels from renowned global manufacturers, and combined them with latest technologies. All models from this series also boast Wi-Fi 5GHz, for a faster and more stable connection.

GENERAL

Screen Size	75" (189cm)
Display Type	10 bit IPS
Screen Resolution	3840x2160
Tuner Type	DVB-T/T2/C/S/S2
