

Front-loading washing machine **WF101490C**

Strong and beautiful.

This Tesla washing machine is your elegant and sophisticated washing expert, ready to tackle loads of dirty laundry – but with style!

Inverter motor

This Tesla laundry machine has a brushless inverter motor, which can last for more than 10 years, help you save energy, and reduce the noise while the machine is running a cycle. Choose increased energy efficiency and shorter average washing time with this fast, quiet and reliable device!

Drum clean

This feature means that the machine drum can be cleaned and sanitized at a temperature of 85 degrees Celsius. For even better results during this process, you can put an appropriate amount of chlorine-based product in the drum

Auto dosing

The machine is equipped with an auto dosing system, which means it can automatically add the optimal amount of liquid detergent to individual cycles, according to your laundry load. Simply fill up the detergent reservoir, and enjoy efficient cleaning and excellent washing results with every cycle!

Anti-vibration features

Thanks to its stable structure and a load balancing system, this washing machine minimizes shaking and vibrations, and decreases the noise level while operating. This means your device isn't likely to "jump" across the laundry room, or keep you up at night with loud noises!

Ozone refresh

The ozone generator turns oxygen into ozone, which helps with eliminating bacteria and fighting unpleasant smells coming from the washing machine. When this feature is activated (separately or with selected programs) and the process is completed, the ozone goes back to its original form of oxygen.

Front-loading washing machine **WF101490C**
