Washing Machine WF71460T

TESLA

Energy class A

According to the new energy efficiency labels, this device belongs to the highest energy class, A. Using devices with high energy efficiency ratings is good for the environment: with this Tesla washing machine, you get to save both energy and money, as well as contribute to reducing carbon emissions.

Wool care

This Tesla device has a program for washing machine washable wool products, certified by The Woolmark Company. It is designed especially for wool garments, in order to prevent damage to these sensitive items – if they're washed according to the instructions on the garment label, and those issued by the machine manufacturer.

Inverter motor

This Tesla laundry machine has a brushless inverter motor, which can last for more than 10 years, help you save energy, and reduce the noise while the machine is running a cycle. Choose increased energy efficiency and shorter average washing time with this fast, quiet and reliable device!

Intelligent washing

This washing machine can automatically tailor the cycle settings according to the weight of the load and a variety of other factors, making the process even more convenient. Smart sensors keep track of various aspects, such as temperature level, water level, load balance etc.

Diamond-shaped drum pattern

In order to provide a 360° professional care for your clothes, the new drum pattern helps the machine remove stains quickly and efficiently, as well as reduces the possibility of tearing. Also, the machine has a light indicator that will remind you when it's time to run a drum self-cleaning cycle.

High temperature cleaning

You can wash certain items made of cotton or linen at 90-95°C, which results in expert cleaning and helps with bacteria removal, protecting the health of your family. Make sure to use high temperature cycles only when washing cotton, towels, and similar sturdy items.

Rated Power Supply 220V-240V~ Rated Frequency 50 Hz Rated Washing Capacity 7 Kg Rated Spinning Capacity 7 Kg Rated Power 1850 W Rated Current 10 W Power consumption left-on mode 0,5 W Max.
