

Automatic temperature control

The cooking temperature stays at a preset level, allowing you to cook delicious meals at just the right heat. It's time to wow your friends and family with tasty grilled bites, made at the exact temperature you want!

Cool touch handle

Even if you're cooking food at a high temperature, the device handle will remain cool and safe to touch. This makes the grilling process easier, and protects your hands and fingers from getting burned while you're opening or closing the device.

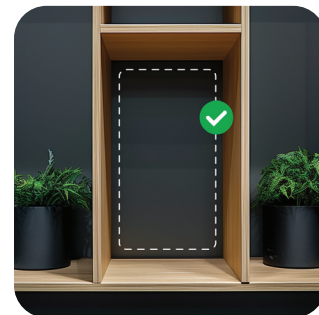

Floating hinge system

Want to grill a thick piece of food without crushing it? Floating hinges allow for even heating of both sides, adjusting to the thickness of food so it's evenly cooked – even when you're grilling chunkier pieces.

Non-stick plates

Non-stick coating makes the device plates quite easy to clean after you're done with grilling. This means you can spend less time cleaning, and more time having fun with your friends and family.

Vertical storage

The grill can be locked and stored vertically, so it takes up less space in your kitchen or on your countertop. It won't get in the way, yet it will be easy to access once you decide to use it again!

Model	GR100BX
Power	700W
Color	Black- inox
Non-stick plate	Yes
Plate type	Grill
Plate dimension	230*145 mm
Detachable plates	No
Easy Cleaning	Yes
Overheating protection system	Yes
Control temperature knob	No
Control timer knob	No
Opens 180° with Red push button	No
