

Heat pump technology

Heat pump technology makes your tumble dryer more efficient, helps it work faster, and it also allows you to save energy and be more environmentally friendly by reducing power consumption. This system can reuse the heat generated during the drying process - and it can also control the temperature inside the drum in order to protect your clothes, keeping it below 50°C.

Clean and safe

The Clean and safe feature is automatically activated during the drying cycle, while the Hygiene Pro system helps keep your laundry clean: after the cycle is completed, the inner drum will keep the temperature for more than 30 minutes to help with sanitizing. The drum will also rotate once in a while for a certain amount of time after the cycle is done, in order to prevent creases.

Wool care

This Tesla device has a program for drying machine-dryable wool products, certified by The Woolmark Company. It is designed especially for wool garments, in order to prevent damage to these sensitive clothing items - but only if they're dried according to the instructions on the garment label, as well as those issued by the machine manufacturer.

Silent drying

If you're used to drying your clothes at night, or you simply want the device to be even quieter than usual, make sure to use our specially designed night mode. Once this feature is activated, the rotation speed will decrease, the drum will spin more gently, and the amount of air inside the drum will be limited, which makes the operation silent throughout the cycle.

Drum light

LED light in the drum is a convenient addition that illuminates the drum from inside, which makes it easy for you to see if you've taken out all of the laundry - or if any clothing items have remained hidden inside. This way, you'll never have to wonder how did that one different-colored sock end up being dried with your white load!

Touch screen

Compared to traditional buttons, touch screens last longer, and they also improve machine's overall accessibility and aesthetics. When it comes to this specific Tesla device, LED digital display helps you keep a close eye on the drying process, allows you to preset the start time, keep track of all the important cycle information, and enjoy many other useful features.

Strong and beautiful.

KARAKTERISTIKE	
Napon	220V~240V~
Frekvencija	50 Hz
Kapacitet sušenja	8 kg
Snaga	750 W
Struja	3.5 A
Snaga motora	
Displej	LED
Boja displeja	Bela
Tip sušenja	Kondenzacija sa toplotnom pumpom
Kontrola sušenja	Elektronik
Interior lighting	Da
Vrsta utikača	Euro
Dužina napojnog kabela	1,5 m
Transparentni prozor	Da
Obrnuto pravac prevrtanja	Da
Zujalica	Da
Opcije ventilacionih cevi	Da
Displej za proveru greške (indikator)	Da
Zaštita za decu	Da
OCENA SNAGE	
Klasa energetske efikasnosti	C
Klasa efikasnosti sušenja	B
Godišnja potrošnja energije (AEC)	176 kW-h/godišnje
Potrošnja energije (puno opterećenje) (Edri)	1,45 kW-h/ciklus
Potrošnja energije (delimično opterećenje) (Edri 1/2)	0,79 kW-h/ciklus
Ponderisano vreme programa standardnog programa za pamuk (Tt)	123 min
Vreme programa pri punom opterećenju (Tdri)	159 min
Vreme programa pri delimičnom opterećenju (Tdri 1/2)	96 min
Efikasnost kondenzacije pri punom opterećenju (Cdri)	81%
Efikasnost kondenzacije pri delimičnom opterećenju (Cdri 1/2)	81%
Emisije buke u vazduhu	66 dB

PROGRAMI I PERFORMANSE		
Broj programa		14
Kružni selektor	Cotton- Iron	Da
	Cotton- Standard	Da
	Cotton- Extra	Da
	Synthetics-Extra	Da
	Synthetics-Standard	Da

	Hygiene	Da
	Lamp	Da
	Silence Dry	Da
SPECIFIKACIJE		
Zapremina bubnja		125 L
Unutrašnji materijal bubnja		Pocinkovana čelična ploča
Ugao otvaranja vrata		180
Prečnik vrata		375 mm
Spoljni prečnik vrata		480 mm
Dimenzije uređaja (WxDxH)		595 × 640 × 845 mm
Dimenzije paketa (WxDxH)		685 × 695 × 885 mm
Neto težina		53 kg
Bruto težina		57 kg
Boja		Siva
